

Community

Community refers to the people around the airport and their homes, public spaces, and community facilities

Expanding Heathrow will potentially affect communities around the airport, during construction and once the new runway is operational.

The policy context

The Airports National Policy Statement requires that a **Community Engagement Board** is established to “ensure that local communities are able to contribute effectively to the delivery of expansion, including to consultations and evidence gathering during the planning process”. The independent Heathrow Community Engagement Board was set up in 2018 and is actively working with communities to make sure that engagement between Heathrow and local people is constructive and effective.

Engage with us

Engagement with local residents and community groups is critical to making sure that communities can understand the potential effects of the Project, and influence the mitigation of them.

We are working to collect as much information as possible about the people and places that could be affected by expansion. To build a detailed picture of the current situation we have been reviewing published data.

We also want to engage with community groups and the organisations that provide, protect and use important local community facilities and public services.

We would really like you to tell us the position of the organisation you represent on issues and considerations relating to potential effects on communities. We would like you to tell us about what’s important to you, so that we can make sure we identify ways to manage any effects and put in place the most effective mitigation.
